PROJECTS

AI-Powered Government Welfare Scheme Assistant | *React, TypeScript, Python, FastAPI, PostgreSQL, Qdrant, LangChain, Hugging Face* [GitHub]

- Developed a full-stack AI-powered platform that simplifies government welfare scheme discovery by providing personalized recommendations based on user needs and eligibility criteria.
- Implemented a Retrieval-Augmented Generation (RAG) pipeline using Qdrant, Sentence Transformers and a locally hosted LLM to deliver context-aware answers grounded in scheme records and uploaded documents.
- Engineered RESTful APIs with FastAPI and PostgreSQL, integrating JWT authentication, role-based access control, document management and multilingual assistance.

Full-Stack E-Commerce Platform | *React, Node.js, Express.js, MongoDB* [GitHub]

- Developed a full-stack MERN e-commerce platform with JWT authentication, role-based access control (Admin/User) and 15+ RESTful APIs for product, order and user management.
- Implemented product search and filtering, shopping cart, wishlist, order tracking and complete CRUD operations with a responsive UI across devices.
- Built an Admin Dashboard to manage 100+ products, categories, users and orders; deployed the frontend on Vercel and the backend on Render with MongoDB.
